PRIMULA

(primrose)

Few hardy plants create the riot of color in early Spring as the primrose. Best planted in massive groups and in sunny — or part shade — and moist situations. We list heavy bed-grown clumps, plants which will burst into heavy bloom in early April. An excellent Florists' item for early spring forcing.

COLOSSEA

A superb mixture, large flowered, in a broad range of colors.

MUNSTEAD

Large-flowered, shades of yellow, every one of which is easy to sell at blooming time.

Clumps 25 @ \$4.50; 100 @ \$17.00; 1000 @ \$160.00

GYPSOPHILA

(baby's breath)

BRISTOL FAIRY

A very satisfactory hardy plant, useful for both garden planting and cutting for the commercial market or flower shop. The large double white flowers are on airy sprays, with a long season of bloom.

Pots 25 @ \$5.50; 100 @ \$20.00; 1000 @ \$180.00

300 of a variety at the 1000 rate
